- Sungaba Public Secondary School

Collaboration and Partnership

We are working in the same environment and we all have the common interest and goals of providing quality education in the community. The common efforts of all the educational institutions help in the pious objectives of educating our young generation and contribute in national building. The common problems can also be solved by fostering partnership. As a non-profit institution we can work together in the educational and academic promotional activities:

- 1) Sharing **information** about students
- 2) Provide opportunities for **higher education** learning.
- 3) Conduct **awareness program** in the educational and environment activities.
- 4) Work together for the promotion of **games / sports** as part of education.
- 5) We can combine our resources in extra **activities such as quiz/debates** and form a group to search **talent, ideas and concept** which are underlying in the students.
- 6) Partnering also provide all of us with opportunities to continually learn improve and create **employment opportunities**.
- 7) Sharing educational experiences of lifelong learning can benefit all of us equally for **institutional development** and add value in the society.
- 8) We all can connect our communities in order to produce **active citizens** who are engaged in their neighborhoods and fulfill local needs.
- 9) Our institutions can collaborate in promoting and practicing **moral activities** by imparting moral **values and ethics** to our young students through training which can create positive vibes in the society and help in nation building.
- 10) We can work together to reduce drop out ratios and increase the literacy rate in Sainamaina Municipality and therefore we together will be helping the local government .
